

Photo-Sonics, Inc. Introduces the New Remote-Head Camera

Burbank, CA, March 10, 2011 – This new camera is an airborne-qualified high-resolution video camera that includes both a Lens Iris Automatic Exposure Control and Automatic-AGC. This configuration is ideal for recording raster and stroke recorded displays without flicker and other applications requiring a camera with a wide range of exposure. This camera system has an environmentally-sealed lens and electronics that can image in high ambient sunlight to near dark.

For further details and information, please visit the [Remote-Head](#) Camera web page.
