

Photo-Sonics receives contract to provide Head-up Display cameras for the Boeing F/A-18E/F Super Hornet and the electronic warfare variant, the EA-18G Growler. This is a follow on contract which includes deliveries in 2010 and options for two additional years. The HUD camera is installed on top of the Head-up display, directly in front of the pilot, and records the pilot's eye view including the HUD symbology and any targets of opportunity. Photo-Sonics has supplied over 450 cameras for the FA-18E/F beginning in 2004. Photo-Sonics manufactures 14 different HUD camera configurations flying in 14 countries around the world.
