

Photo-Sonics, Inc receives U.S. Navy contract to supply HUD cameras for the AV-8B “Harrier” Aircraft.

Photo-Sonics has received a contract from the U.S. Navy to replace all 135 legacy HUD cameras on the U.S. Marine Harrier aircraft. Additional qualities include FMS deliveries of 40 HUD cameras to Italy and Spain. This new camera configuration provides the U.S. Marines and other AV-8B operators with a highly reliable HUD camera.

The camera is a form, fit and function replacement and requires no modification to the aircraft. The original HUD camera had become impossible to support due to the obsolescence of electronic components. Photo-Sonics supplied new cameras at a fraction of the cost the U.S. Navy was paying to repair the legacy camera. In 2004 Photo-Sonics received the Small Business Administration “Prime Contractors Award” for the 9th District for our performance on this program.
